Imaging Module

Truly Field Upgradable Imaging Module

Designed to Evolve

TPG's new Check Imaging Kit was engineered to be modular, capable of seamlessly retrofitting the A776/B780 printer to support digital check imaging. The Kit's future-proofed design provides the insurance you need when choosing a POS printer and are unsure about check imaging at the POS.

Ease of upgrade

Complimenting its smart modular design, TPG's Imaging Kit is the only system on the market that can upgrade a standard POS printer to support imaging in under 15 minutes. Unlike other solutions, TPG's Kit is truly field-upgradable and does not require a complete teardown of the unit. In other words, it's cost effective.

Flexible media imaging

Regardless of whether you want to scan rigid items such as ID cards or supple media like checks, TPG's Imaging Module features multiple media paths to suit your needs. The unit's top insertion option offers dual sided imaging of stiff media and checks, while the unit's slip table insertion option features double sided check imaging with MICR reader.

Keeping your options open

If you are unsure about imaging checks at the POS, know that TPG has a solution designed to grow with your needs. To find out more about TPG's cost intelligent products call us at 1 800 732 8950 or visit us online at www.TPGprinters.com

Technical Specifications

Type:	CIS (Contact Image Scanner)
Resolution:	203 dpi
Single-pass scanning:	Two-sided
Mode:	256 level grayscale, black and white
Speed:	7.5 inches/second (190 mm/sec)
Data transmission format:	CCITT Group 4, TIFF, Raw
Memory for scanning:	8 MB RAM
Scanning area:	Width max 4 inches (100 mm), Length max 11.25 inches (285 mm)
Weight:	Imaging Module Only 2lbs. (0.91 kg)
Dimensions (W X D X H):	Module
With Printer – 6.5 in. X 13.25 in. X 6.65 in. (165.10 mm X 336.55 mm X 168.91 mm)	
Without Printer – 6.5 in. X 5.74 in. X 4.4 in. (165.10 mm X 145.79 mm X 111.76 mm)
