

CAV-3500

POS Scanner &
Age Verification

CARDCOM TECHNOLOGY
www.viage.com

ViAge age-verification multi-purpose scanner is an all in one solution that supports mag-stripe reader and barcode DL reading as well as PC barcode to scan items. It is an integral component of the POS System, helping to prevent the sale of alcohol, tobacco, and other age-restricted items to minors. It takes the guesswork out of determining a customer's age. By a simple swipe or scan of a state-issued identification card, the scanner calculates and displays the age & expiration date on the LCD screen. The ViAge is pre-configured to guarantee seamless integration to new and existing G-SITE, Ruby, and other major system users through "Plug-N-Play" out of the box implementation.

- Why ViAge?**
- Prevent sales of age-restricted items to minors
 - Optimizes counter space by running in same terminal used for payments
 - Supports magnetic stripe and 1D/2D barcode licenses
 - Provides detailed reports for merchant records.

Features

Multi-Purpose Card Reader

Magnetic Stripe Reader
1D/2D barcode reader
IC Card Reader & Writer

Password Protection

Credit Card Verification

Flash Memory (4mb capacity)

Reliable Symbol Omni-Directional UPC Scan Engine

Compact(W:95mm X L:180mm X H:73.9mm)

Portable (Lithium Ion Rechargeable Battery)

Graphic LCD with backlight

Interfaces: RJ-45 / PS-2 type and serial port / Keyboard wedge

Software

PC Requirements for Software:
