LCD Integrated Touch Screen POS Station

Touch Screen Systems are very intuitive, effectively increasing input speed and reducing operator-training costs.

Wireless Keyboard

The Wireless Keyboard is designed to ease service and security concerns. The mini-QWERTY design interfaces seamlessly through the PT-4000i Infrared keyboard port. The effective angle of the interface is 45° within a maximum distance of 7 meters.

Magnetic Card Reader

Spill resistant modular design for convenient and trouble free integration

Application Friendly

Open architecture design supports application under industry standard operating system for Retail, Food Service, Medical, Manufacture and Information Kiosk.

The PT-4000i series demonstrates our commitment to provide products that meet today's requirements and emerging trends for the future. Partner Tech has incorporated specific features to meet the most stringent demands of retail and hospitality environments.

The all-in-one design of the PT-4000i enhances system integration with functionality, performance, durability, and reliability.

Yet retains the expansion capabilities of an open architecture system, maximizing the choice of peripherals. The PT-4000i can operate as a stand alone or within a network. The modular design increases installation efficiency and service. Its dirt and spill resistance design provides reliable operation under the most hostile conditions.

Smart Card Slot

Customer Pole Display

Bright and large characters. 2x20 VFD or LCD Graphic

Wall Mounting Model

Screen viewing angle is easily adjusted for different users. A self-adjusting friction hinge keeps the screen securely in place.

A key lock provides tamper resistant access to Hard Drive, connectors or CD-ROM.

Rear Customer Display

40 Keys Keypad

Chip and Pin capable, options: integrate MSR, smart card reader.

New

PC104 Slot

Internal CD-ROM or Floppy Disk Drive
