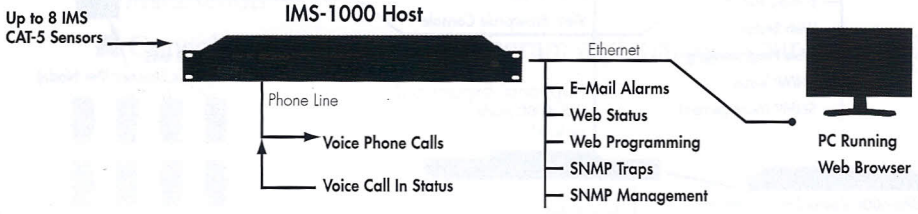
# IMS–1000

The IMS-1000 is designed to be a comprehensive method of ensuring 100% up-time in many applications including computer systems. By monitoring all aspects of the application, including environmental conditions and network equipment, the system will keep you informed of the status of your infrastructure. Monitored conditions can include temperature levels, humidity levels, line voltage, leak detection, server response, UPS systems, and more. The IMS-1000 system allows the user to be notified immediately of any detected problems. Notification can occur via voice telephone call, pager, e-mail, fax or SNMP trap. An internal battery backup system insures that the unit will continue to run if main power fails.

## Features

The IMS-1000 series of products includes the following key features:

- Eight sensor inputs to monitor environmental conditions and/or alarm contacts from other computer equipment such as UPS systems.
- 10/100BASE-T Ethernet port.
- Internal battery backup for uninterrupted performance.
- Compact design allows rack-mount, wall-mount, or tabletop installation.
- Embedded web page to program and manage your IMS-1000 system.



### Package Contents

(1) IMS-1000

(1) AC Adapter

(1) Telephone Cable

(1) Rack Mounting Bracket & Hardware

(1) Installation CD

(1) Solution Manual
