

Panasonic Camera

Description

The Panasonic BLC111A network camera is ideal for monitoring your small business property, data center, or residence. The camera can be used in combination with the IMS-1000 or IMS-4000 systems to send camera snapshots via e-mail when alarms are detected.

The camera features a 10x digital zoom function in addition to remote pan and tilt controls. This allows you to control the direction of the camera right from your web browser. The camera also has a built-in microphone so that you can hear sounds from the remote site as well. A privacy mode can be activated either at the camera, or remotely in administrator mode, which will cover the lens.

Specifications

Package Contents

- (1) Panasonic camera
- (1) Power supply
- (1) Quickstart guide
- (1) Installation guide and manual
