

## Inventory & Purchase Orders

*Inventory is a key component of every retail business. A store must have the proper number of items in stock to satisfy customer demand; at the same time, you want to avoid overstocking which wastes shelf space and reduces margins. Cash Register Express has built-in inventory tracking that reduces the time it takes to track and reorder inventory.*

### Track Your Inventory Electronically

#### Run Discrepancy Reports to Identify Theft & Shrinkage

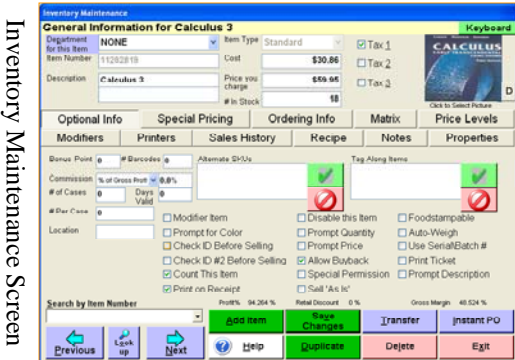

- By watching your inventory and comparing on shelf inventory to your computerized reports, both you and your employees are much more careful about giving away inventory, retaining obsolete inventory, monitoring breakage and non-theft inventory that “walks out” of your business.
- You can use an optional handheld computer to quickly scan and count the inventory in your store. Use Cash Register Express to generate a discrepancy report that will tell you which items are missing, indicating either theft or an error in the inventory handling process.

### Reduce Theft & Increase Profit

#### Use CRE to track inventory, reduce theft and increase profit by 2.5%

- Record vital information on each inventory item.
- Assign multiple vendors to each item with their own cost and part number, allowing you to track and order at the lowest cost.
- ‘Clothing Matrix’ built in to track size and color.
- Full sales history recorded for each item; a list of what you sold, when you sold it and for how much.
- Low stock alerts to help you reorder on time.
- Built-in purchase orders to automate your reordering process.
- Multiple levels of pricing.
- Discrepancy reports to locate theft and shrinkage.

Inventory Maintenance Screen

*The Inventory Maintenance Screen holds your master list of items. Re-order information, cost and price, special pricing, notes and dozens of other options are entered through this easy-to-use screen that can be accessed from any terminal.*

PC America is everyone's #1 Choice,  
 "With so many brands and varieties, it's very tedious—and fairly inaccurate—to take inventory and make sure you order everything you need. Cash Register Express gives you real time stock levels, allowing me to order more accurately and take a physical inventory less often."  
 - Dan Butler, Owner of Lighthouse Liquor

## Inventory & Purchase Orders

*Hudson Valley Renegades. Minor League Baseball Stadium. 37 pennants. 16 bats. 41 Renegades bears, 31 of them red, the remaining 10 green. Countless other souvenirs. All sold in under an hour. Kathy knows what sells best in her store, but “computerizing with Cash Register Express really saves me time. Ordering merchandise is now a five minute process, not three hours like it used to be.”*

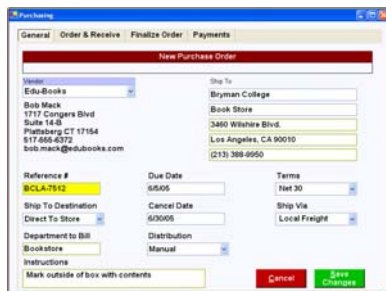

### Purchase Orders Save Time, Automate Restocking

Purchase orders are built into Cash Register Express via a friendly and easy-to-use screen. The automatic re-ordering feature can save a significant amount of time; with the touch of a button, CRE will automatically create a purchase order for all products in your store with low stock levels. From there you can make modifications to the order, or simply click to complete the purchase orders; you can even configure purchase orders to automatically e-mail to your vendor, eliminating one more step.

#### A Few Features:

- Purchase history tracks how much you bought from each vendor.
- Automatically replenish low stock items.
- Process deliveries using a handheld device for fast and accurate receiving.
- Combine items from multiple stores.
- Look up pending orders for specific items.

### Sale Pricing, Bulk Pricing, Happy Hour, Mix 'N' Match

CRE allows for a variety of pricing which you can creatively use to raise your sales.

- Bulk Pricing (ex: 1 for \$5, 2 for \$8.50) encourages customers to buy that extra item even if they didn't need it.
- Sale Pricing (ex: 10% off all jackets) helps draw people in and also move older merchandise.
- Time Based/Happy Hour Pricing helps draw crowds in when you're not normally busy.
- All price levels kick in automatically.

### CRE Makes Sure You Don't Understock Inventory

You Probably know not to stock snow shovels in June; however, CRE shows you that you sold 217 snow shovels last winter and you should probably order 230 for this season. CRE helps spot these trends to ensure you are prepared with enough stock to meet demand without much extra to clutter your shelves.
