Wireless Indoor Power Failure Sensor

Description

The WSR-0102 Wireless Indoor Power Failure sensor is designed to work with the Sensaphone 2800 Environmental Monitoring System. This sensor includes a built-in radio transmitter, AAA alkaline batteries and a wall plug in power supply. The sensor will detect a loss of power at the outlet where the power supply is attached. The 3 AAA alkaline batteries will power the sensor and allow it to transmit alarm information in the event that AC power fails.
