

4-20mA
Series

4-20mA TYPE PRESSURE SENSOR

Remotely monitor pressure

This pressure sensor can measure and detect loss of pressure in many applications, preventing pump motors from warping or overheating. The sensor triggers an alarm when it detects pressure changes from clogged influent lines, loss of suction, downstream clogs, burst pipe, etc. Not for use in hazardous locations.

TECH SPECS

Name	4-20mA Type Pressure Sensor
Pressure Sensing Range	0 to 200 psi
Operating Range	-40°F to 194°F -40°C to 90°C
Accuracy	± 0.5
Connection	1/4-18 NPT
Operating Voltage	8.5 to 36 DC
Dimensions	2.63" x .75" 67 x 19mm
Sensor Series	4-20mA
Notes	Requires a 24VDC power supply (FGD-0070)

All specifications subject to change without notice

Product Name

Part Number

4-20mA Type Pressure Sensor. FGD-0301
