# TSP600II - Quick Speed, Entry Level Printer

**After the huge success of the TSP600, Star Micronics has decided to further enhance one of its legacy entry-level thermal printers by introducing the NEW TSP600II.**
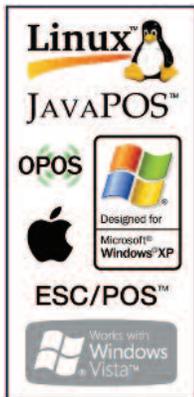

The TSP600II features the best of both worlds by coupling the comfort of legacy products with the speed and connection options demanded today in hospitality environments. The TSP600II has all the new features of the TSP100 series, such as low cost and high performance combined with the ability to work effectively in any environment. Out of the box, the TSP600II can easily be configured in Star Line or ESC/POS™ emulation mode and features all interface options including USB and Ethernet due to its plug-in modules. New vertical mounting stand and splash proof cover options help make it one of the most reliable POS printers in the world.

The TSP600II ships with Installation CD (Printer Driver / Manuals), setup guide, wall mount bracket, vertical mount pads, 58mm paper guide, power switch cover and start-up paper roll. With its "drop in and print" paper loading, small footprint and reliable guillotine cutter, the TSP600II is a welcomed addition to POS systems.

In addition, the TSP600II comes with Star's 3-year Limited Warranty, plus optional Extended Services Agreement Policies (Extend-A-Star and Swap-A-Star).

The TSP600II is ideal for retail establishments and restaurants.
